

IV. ANEXOS:

Programa MATLAB de Representación:

```
function u=representacion
```

```
load solucion.dat;
```

```
load exacta.dat;
```

```
load coordenadas.dat;
```

```
load triangulos.dat;
```

```
figure(1)
```

```
trisurf(triangulos,coordenadas (:,1),coordenadas (:,2),solucion),...
```

```
view(0,90),...
```

```
colorbar,...
```

```
shading interp;
```

```
figure(2)
```

```
trisurf(triangulos,coordenadas (:,1),coordenadas (:,2),exacta),...
```

```
view(0,90),...
```

```
colorbar,...
```

```
shading interp;
```

```
figure(3)
```

```
trisurf(triangulos,coordenadas (:,1),coordenadas (:,2),(abs(solucion-exacta))),...
```

```
view(0,90),...
```

```
colorbar,...
```

```
shading interp;
```
